Friday evening there was another mixup, as a result of which a striker, said to be named Eaton, was taken to St. Joseph's hospital, where a scalp wound and a cut over one eye were dressed. Reports of the scrap which had no witnesses, vary, each side accusing the other of "starting things."

Worcester papers have devoted much space during the past week to the making of trouble for the company, of which Daniel Hale Fanning is president, nullified the threats of agitators to make trouble for the company. We, with the majority of the employees of players' association of Worcester county, are members of the Empire and the practice of the open shop, and the members will not grant demands made upon them at the instigation of union officials."

"We are prepared, if necessary to close this plant indefinitely. To those employees who desire to continue free and independent workers, we pledge protection."

"In the 18 years that I have had charge of this factory, my office has always been open to any individual or group of individuals who have desired to discuss matters with me. This will continue in the future as in the past."

Every operative expressed a preference for the present policy of the big works, and as a reward for their loyalty, Supt. Bennett announced that the factory would be set to work at once on the manufacture of 100,000 pairs of corsets, insuring the employees steady work all through the winter, even though at no profit to the company.

TUBERCULOSIS ONE OF THE PROBLEMS OF THE WAR

A Large Number Have Been Unable to Withstand Rigors of the Campaigns.

Paris, Oct. 17.—(Correspondence of The Associated Press)—Among the many problems with which the government has to deal as a result of the war is that of tuberculosis. Life at the front has cured or benefited many soldiers predisposed to lung troubles. On the other hand a large number have been unable to withstand the rigors of a long campaign and the white plague has left its mark in the ranks.

As the treatment and care of tubercular soldiers the department of public hygiene has at its disposal a preliminary sum of 2,000,000 francs (\$400,000). As all arrangements for caring for the war victims have not been completed, the War Department has temporarily undertaken the task and has been granted for each patient an allowance of 2 francs (40 cents) a day for three months. While the sanitary service is studying the best means of dealing with the question, the army is at work weeding out all who show the slightest indication of tuberculosis.
